BLINDS MOUNTING CONDITIONS

5 cm

7 cm

4 cm

## #1

blinds motors are powered
by **230V / 50Hz** voltage
the power cable should be installed in the wall
**5 cm** from the window's edge
on its left or right side

#2

minimum distance from
the ceiling to the top edge of
the window recess must be
bigger than the height of the
cassette

see the table below

the table below shows the cassette sizes
depending on the fabric type use and the
mounting method

	blinds mounting method	
	to wall	to ceiling
	height / depth of cassette	
fabric blinds	8 cm / 7 cm	7,5 cm / 7,5 cm
day - night blinds	9 cm / 8 cm	8 cm / 9 cm

#3

minimum blinds cassette width
is **7 cm** larger
than the window recess
and **4 cm** wider than blinds fabric
for every side of the window

for individual order
we can make bigger size of cassette

3 cm

3 cm

#6

minimum blinds fabric width
should be wider than
the window recess by at least
3 cm on each side
assuming that blinds cassette
mounting is directly by the wall

#4

maximum blinds height
(fabric length) is **300 cm**

#5

maximum blinds fabric width is **300 cm**
larger roller blinds widths require consultation
please refer to the available fabric catalog or send us inquiries.

#7

to control blinds we can use:

· standard wall-mounted switches (wired or radio-controlled)
· control modules compatible with smart home systems, such as the **Fibaro system, KNX, Apple HomeKit, Qubino, Home Assistant** and others
· remote controlers

* the control module is not included in the finished roller blinds
